DOLLAR PRINTER EVEN/ODD AND OVER UNDER STRATEGY.

Analysis of even odd using Candlesticks

This strategy works on Jump Index because jump index is very consistent on the trends. As we know Even/odd goes with the up and down trend so we need a good pair for that so i choose jump index after a few weeks of trying this strategy it has shown to work great.
The method also works best with volatility 75 and 100 following the same criteria.
Note volatility are jump index, volatility 75, Volatility 100

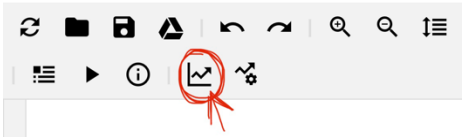

This is an example. As u can see the trend. But this means u cannot stay for too long in the market. Only 10 runs maximum.

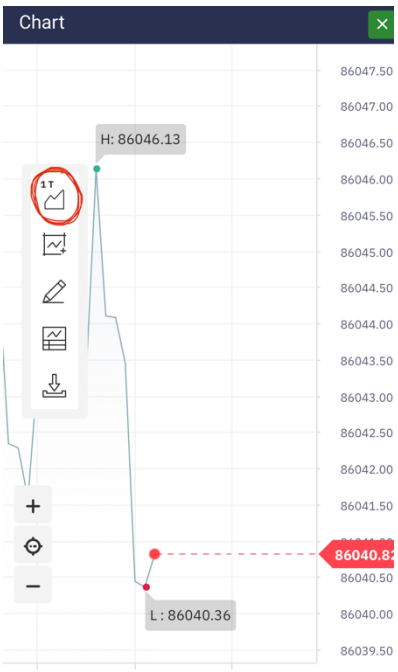

This is how to set.
Best bots for this strategy.
Candle mine and Tc bot and NoLimitzbot all versions. Trade type even odd.

How to check the market before starting the bot do this if u dont have a DAT tool.
Step 1.

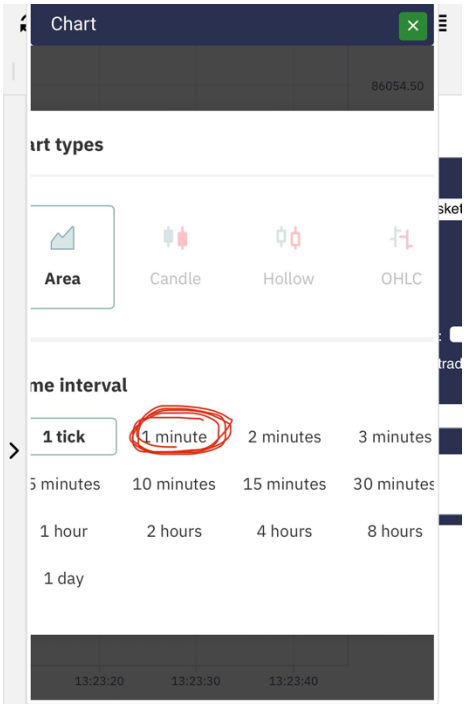

Tap on the graph.

Step 4.

Step 5.

As u can see we have a trend here. So u just have to wait for it to go up or down. Down mean even Up means Odd.

The Dollarprinter printer even odd over under Strategy using Derived Analysis Tool.
This works best as charts at times bring uncertainities.

Analysis of digits is done best with the deriv analysis tool tool as it shows realtime movement of Candlesticks
When you want to analyse Over contract type prediction(3),you must check on Even number above 12%percent and above expecially Even number (8) when has 12%percent and above you trade Over (4,3) contract type.
Analysing under market in Derived analysis tool, when odd number(1) has 12%and above you trade under contract type prediction number (7,6,5)
When number (4) indicates 12%percent and above you place Even contract type.Only number 4 in all volatilities

from" (Volatility 10,75,100,50
MAIN: VOLATILITY (50INDEX).
When you want to analyse Odd market using derived analysis tool, when only Number (5) indicates 12%percent and above in all volatilities, from Volatility 10,75, 50, you place odd in contract type

NB:Analysis of over and under market make sure the mac D is always positive as positivity of the mac d indicator shows momentum of the market.,
