Adjust Pip Calculation

If you observe that results in pips is not correct for a traded symbol like Gold, Index or Stocks, there is an option to add a multiplier to correct the result in pips for a particular symbol.

Press F3 to open the Global Variables, or use Menu

In case for the XAUUSD, find the row with the name PipAdjust_XAUUSD. Double-click to enter a value of 10

New trade opened with
TP = 10 pips
SL = 10 pips

With PipAdjust = 0
The pip result is not correct

With PipAdjust = 10
The pip result **is correct**
