OVER/UNDER STRATEGY

FIRST INDICATORS TO USE:

1.Moving average for showing the direction of the market.

2.AO MOMENTUM

3.MACD,to show the direction and if the candlestick is strong or weak .See The Above Illustration:

Now this is an OVER MARKET(2'3) .That how you use the indicators.

SECOND INDICATORS TO USE:

1.Moving Average

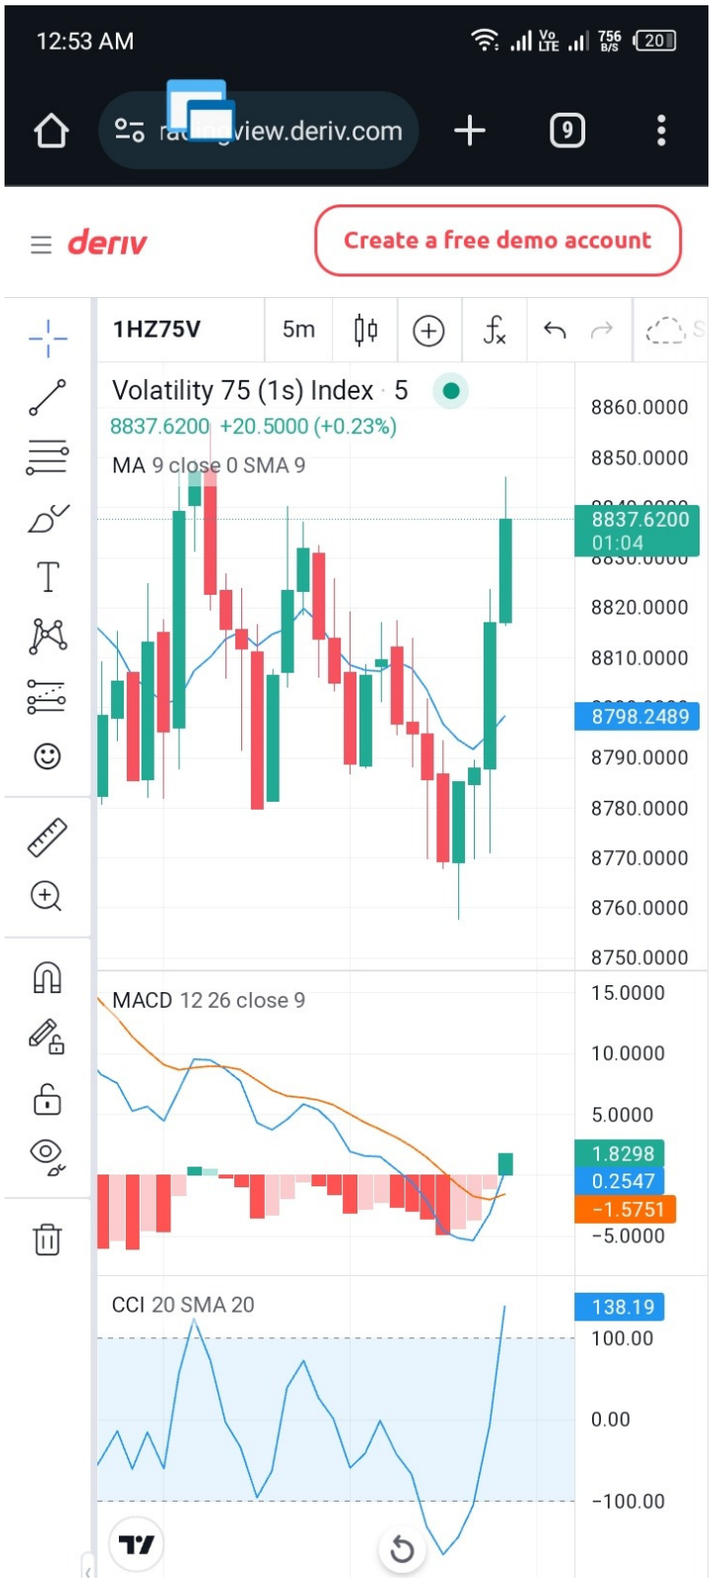

2.MACD

3.CCI,for showing the direction of the market (how its trending).

On Downtrade,the CCI must face downwards on a straight line.thus must be must be (-100 and below)before trading OVER contract type. AND VICE VERSA.uptrade +100 and above.

When the CCI is FLAT, the market is on downtrade and the candlestick has momentum,trade OVER 6'7.

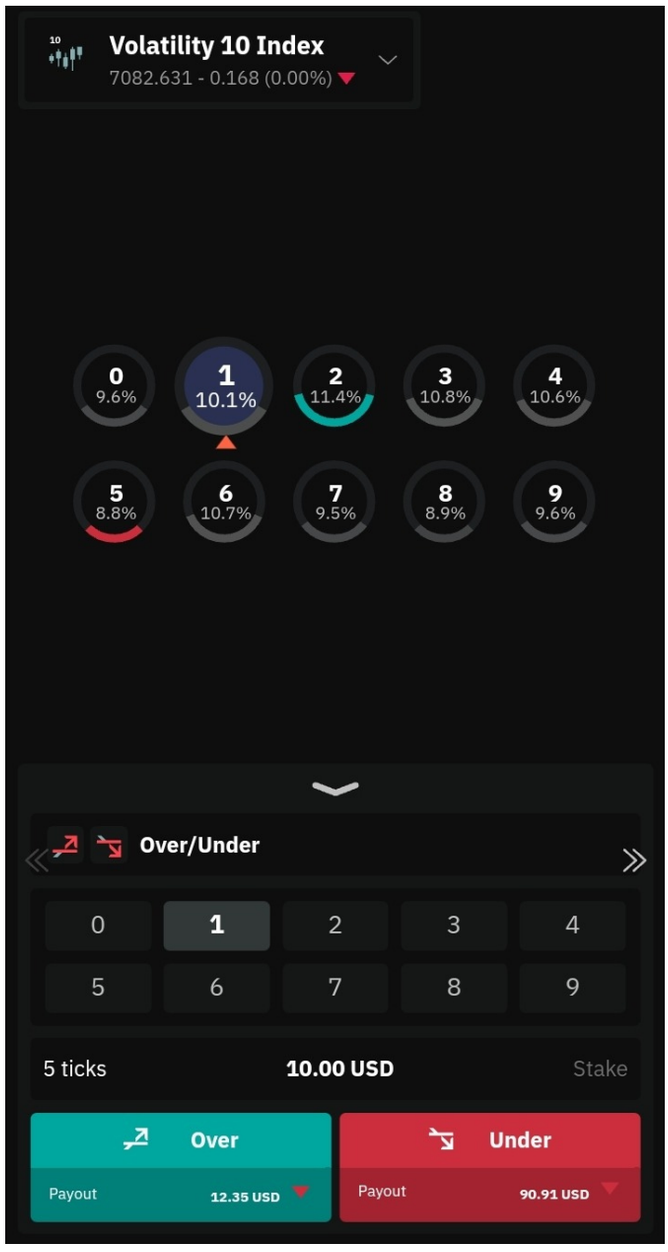

When on uptrade and the candlestick has momentum,trade UNDER 3,4.

Now this is an UNDER market.under(6,7)that how you use the indicators .

NB:AFTER.analyzing the market using chart,now you can confirm the market if its good using Deriv Analysis Tool for better entries.

For UNDER 6) on deriv tool,7,8,9 has to have less percentage (9.9% and below).

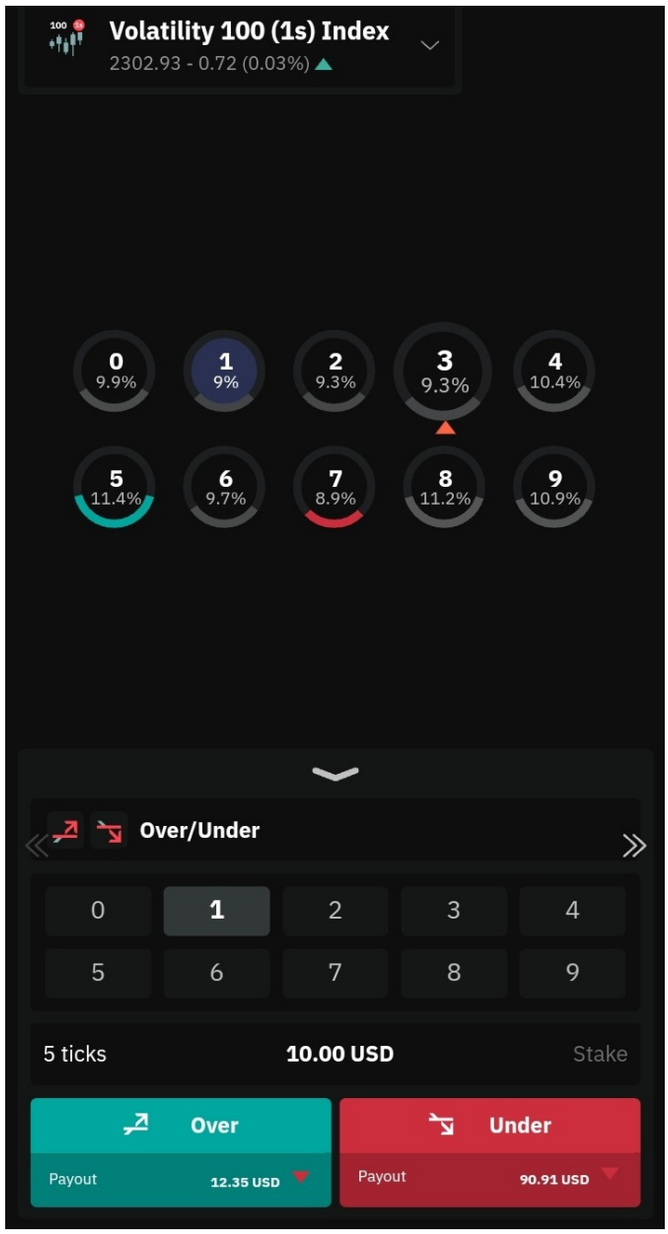

UNDER 6,7

For UNDER ,the most appearing and least appearing

have to be on the same side(the winning side).

OVER,on deriv tool ,0,1,2 has to have less percentage (9.9% and below)

OVER 2,3

The most appearing and least appearing have

to be on the same side(the winning side).

NB:When MOVING AVERAGE is above the candlestick,and the candlestick forming being RED ,trade OVER .

When MOVING AVERAGE is below the candlestick and the candlestick forming being GREEN,trade UNDER.

REMEMBER DO NOT OVER TRADE.

TRADE RESPONSIBLY #TogetherWeWin @Neddy
