| MARVEL PRO GUIDE |

IMPORTANT RULES TO OBSERVE.

- Please Stick to Default bot setting **except** for STAKE and EXPECTED PROFIT where you change it according to your Capital.
  - Set your stake as follows depending on your Capital.

CAPITAL in ($)	STAKE
Below 20	**0.5**
21-100	**1**
101-200	**2**
201-300	**3**
Above 300	**4**

Remember: Greed Destroys 90% of traders. Appreciate the little you get.

- You should only Target 4% of your Capital in ***one*** **trading session.** This will determine the **number of runs** the bot will go. This setting is meant to curb overtrading in one session.
- You should trade between 4-6 sessions in a day (Spread the sessions equally).
- If the bot encounters a loss, stop it immediately it recovers and wait for another session.
- You can Change the Volatility to any Volatility you like. The bot works well in all volatilities.
- *Only run the bot when the market is not on a* ***support*** *or* ***resistance*** *points. Set your chart timeframe to be 1 minute interval and make sure the volatility you are analyzing is the volatility you want to trade.*

NB: *Whenever you feel you have tampered with the bot settings, always refresh the browser and re-upload the original bot then alter what is necessary.*
